Download, install, and sign in to Skype for Business for Android devices

The Skype for Business for Android app brings Skype for Business presence, instant messaging (IM), and voice and video calling to your mobile device.

**IMPORTANT:** To use Skype for Business for Android you need a Skype for Business or Lync account—typically the same user name and password you use when signing in at work or school. If you’re already using the desktop version of Skype for Business, then you have a Skype for Business account.

Already set up and ready to go? See what’s new.

**Install Skype for Business for Android**

1. From your phone, click the to go to the Google Play Store, and search for Skype for Business.
2. Tap Install.

**Sign in to Skype for Business for the first time**

1. Browse your apps until you find the Skype for Business icon (§), and then tap the icon to open the app.
2. Enter your sign-in address (for example, user@domain.com) and password, and then tap the Advance button (→).

Enter your Virtua email address as log in and Virtua network password. Then, open advanced options and type in wjhs\networkID (your personal Virtua network ID).
3. Enter your mobile number with country and region codes. If you’re an enterprise voice customer, when Skype for Business can’t use a Wi-Fi or cellular data network to make an audio or video call, you’ll be called at this number and connected to the audio portion of the call.

4. Choose whether to sync your contacts, and then tap the Advance button ( الغذائي ) to start using Skype for Business.

5. When placing or receiving first call, be sure to allow Skype access to your microphone and camera.
